Funding available to improve water quality of Middle Creek Dam

Sarina Landcare Catchment Management Association (SLCMA) recently received funding through the Australian Government Caring For Our Country Program for a new project at Middle Creek Dam: '*Landholder engagement and on ground activities for improved water quality*'.

This current project will encourage local landholders to implement sustainable land management practices to reduce nutrient runoff, help improve water quality and potentially reduce the incidence of blue-green algae outbreaks within the dam.

Funding is available for landowners living adjacent to Middle Creek Dam or within the Middle Creek catchment to install stock fencing and off-stream watering points and complete revegetation work.

For more information on funding eligibility or how you could become involved in this project please phone SLCMA on 49 561 388.

This project is funded through Australian Government Caring for our Country
